hc1 Insights, Inc., formerly, hc1.com Inc. (hc1) Achieves HITRUST Risk-Based, 2-year Certification Demonstrating the Highest Level of Information Protection Assurance

HITRUST Risk-Based, 2-year (r2) Certification validates hc1 continues its commitment to strong cybersecurity and protecting sensitive data following hc1 first achieving the HITRUST Based, 2-year (r2) Certification in December 2021.

INDIANAPOLIS, March 12, 2024 — hc1 Insights, Inc., the leader in identifying real-time insights and risk signals in complex laboratory data, today announced the hc1 Platform® hosted at Amazon Web Services (AWS) and the hc1 corporate headquarters in Indianapolis has earned Certified status for information security by HITRUST. hc1 first earned Certified status for information security by HITRUST in December 2021.

HITRUST Risk-based, 2-year (r2) Certification demonstrates that the organization's hc1 Platform® residing at Amazon Web Services (AWS), the hc1 office located in Indianapolis, IN, and the Amazon Web Services (AWS) (Data Center) managed by Amazon Web Services (AWS) has met demanding regulatory compliance and industry-defined requirements and is appropriately managing risk. This achievement places hc1 in an elite group of organizations worldwide that have earned this certification. By including federal and state regulations, standards, and frameworks and incorporating a risk-based approach, the HITRUST Assurance Program helps organizations address security and data protection challenges through a comprehensive and flexible framework of prescriptive and scalable security controls.

"Organizations like hc1 are continually under pressure to address current and emerging threats and meet complex compliance, information protection, and privacy requirements. Earning the HITRUST r2 Certification required hc1 to demonstrate compliance with over 550 unique controls within privacy, security, and data management, to name a few," said Shelly Simeone, SVP, Legal and Chief Compliance Officer at hc1. "We are pleased to continue to provide to our customers the highest standards for data protection and information security by achieving the rigorous HITRUST r2 Certification."

"Without consistency, transparency, and reliability, an information security assessment can't provide the requisite level of assurances needed to make important business decisions. That's why we focus on producing the highest quality reports available," said Vincent Bennekers, Vice President, Quality at HITRUST. "Achievement of a HITRUST r2 Certification is an assurance that hc1 takes compliance and information risk management seriously."
