**hc1 to participate in PLUGS Summit, CLMA KnowledgeLab and  
AACC Annual Scientific Meeting and Clinical Lab Expo**

*Summer events provide insights to optimize and reduce costs across health systems*

**INDIANAPOLIS, May 18, 2022** — [hc1](#), the leader in critical insight, analytics and solutions for precision health, is participating in three events this summer to share their expertise and solutions for transforming lab data into personalized health insights. As the demand for operational efficiency in hospitals, health systems and clinical labs continues to increase, executives will discuss practical applications for implementing precision health on an organization-wide scale and ways to deliver the right test and right prescription, to the right patient at the right time.

The first learning opportunity will take place June 1-2, where hc1 will participate in the [PLUGS® Summit](#) in Seattle. Stakeholders will gather to discuss practical tools for laboratory stewardship program development and insurance alignment that will apply to hospitals, health systems, reference labs, insurance payers and patients. James Haarbauer, MS from hc1, and Donna D. Cooper, MS, MBA from Quest Diagnostics, will conduct a workshop, Building a Culture of Lab Stewardship, on Thursday, June 2, from 12:30 p.m. - 1:30 p.m. PT, in the Sound Room on the 3rd floor of the Bell Harbor International Conference Center. General registration for PLUGS Summit includes access to this workshop.

hc1 will also participate as an exhibitor in the Clinical Laboratory Management Association's (CLMA) [KnowledgeLab 2022](#) taking place June 12-13, in Boston. The two-day event will include roundtable discussions and expert-led panel sessions to address ways to eliminate delayed and static data to set the lab up for success.

Rounding out the summer events calendar, hc1 will occupy booth #203 at the [AACC Annual Scientific Meeting & Clinical Lab Expo](#) in Chicago, July 24-28, where connecting with global leaders in laboratory medicine and hearing vital research, as well as learning about important changes in the field, draws hundreds of attendees together to explore the cutting-edge science and technology shaping the future of laboratory medicine.

"It's always a privilege to collaborate with other healthcare and lab professionals from across the country," said James Haarbauer, senior business intelligence consultant of hc1. "Our goal is to share our expertise at hc1 and educate others on how we can help participants gain new knowledge to provide optimal, patient-centric lab testing."

Participants interested in registering for the PLUGS Summit can click [here](#). For more information on KnowledgeLab 2022, visit [this link](#). To secure a spot at the AACC Annual Scientific Meeting & Clinical Lab Expo, [click here](#).
