hc1 Provides Thought Leadership on Health Care Analytics During Precision Medicine Leaders Summit Webinar and 2022 Executive War College Presentation

Spring events provide insights to optimize patient care and reduce costs across health systems

INDIANAPOLIS, March 24, 2022 — [hc1](#), the leader in critical insight, analytics and solutions for precision health, is participating in two events this spring to share their expertise. As the demand for operational efficiency in hospitals, health systems and clinical labs continues to increase, executives will discuss practical applications for implementing precision health on an organization-wide scale and ways to deliver the right test and right prescription, to the right patient at the right time.

The first learning opportunity will take place on Wednesday, March 30 at 11 a.m. ET when hc1 hosts a free [Precision Medicine Leaders Summit](#) webinar: *3 Ways to Advance on a Path to Precision Health*. In this 60-minute presentation, Dr. Brian Patty, Medix Technology CMIO and clinical advisor at hc1, and Brad Bostic, CEO of hc1, will discuss the practical application of precision health and the steps healthcare leaders can take to advance toward precision health on an organization-wide scale.

Additionally, hc1 will present a session titled *Unlocking Actionable Intelligence within the Data-Rich Clinical Lab using Real-Time Analytics to Improve Turnaround Time, Increase Productivity, and Save Money* during the [2022 Executive War College Conference on Laboratory & Pathology Management](#) taking place in New Orleans April 27-28, 2022. John Moyer, senior product director of hc1, and Andrew Boyle, operational analytics manager from Sonora Quest Laboratories, will share a case study on how Sonora Quest Laboratories has used hc1's robust Lab Insights Platform to unlock actionable insights within the lab's data using real-time analytics. Attendees will learn how this actionable intelligence can be used to improve turnaround time, increase productivity and save money.

"We welcome the opportunity to be able to meet and engage during these upcoming events with the best and brightest healthcare and lab leaders in our profession," said Laura Breedlove, SVP of product at hc1. "Having the opportunity to share the ways in which hc1 solutions can add value and to learn together how we can improve outcomes by ensuring that the right patient gets the right test and the right prescription at the right time is invaluable."

Participants interested in registering for *3 Ways to Advance on a Path to Precision Health* can click [here](#). For more information on the 2022 Executive War College and to secure a spot, click [here](#).
